

ASIIS Web Application Password Changes May 10, 2005

To better serve the Arizona public and in conjunction with industry standards, ASIIS modified the Web Application password rules effective May 20, 2005. The changes are as follows:

1. Passwords will expire every 90 calendar days. To ease the transition process, ASIIS is phasing in this new policy.
2. New passwords must be at least six characters in length and contain at least one number. Your existing password will not be affected until it expires. At that time, your new password must conform to the six character minimum length and contain at least one number.
